Dated Kolar, the 1st February 1945.

Subject Town Improvement and Water Supply Grants for the year 1944-1945

Sir,

With reference to your letter No L 7389-400 dated 25/1/45, on the above subject, I have the honour to forward herewith three statements as noted in the margin and to state that statement No 1 contains the works of

- | | |
|--|---|
| 1 Commitments made by Government in respect of Town Improvement and Water supply works | } |
| 2 Town Improvement works for which grants are required now | |
| 3 Water Supply works for which grants are now required | |

Town Improvement for which Government have sanctioned grants in the previous years as noted against each item of the statement. In addition to the works for which

Government grants were sanctioned in previous years, the works which are of urgent necessity in the interests of public convenience have been selected by me having regard to the general finances of the concerned Municipality and are included in statements Nos 2 and 3.

2 In respect of incomplete works, the drainage schemes of Hulbail and Kolar are partly financed by Government grants. The Municipal Councils of Hulbail and Kolar have each come forward to spend Rs 2000 during this year. The work is in progress in Hulbail while it is about to be taken up in Kolar. As these schemes are incomplete and as the Sanitary Engineer has taken action to push through the work, the grants asked for may kindly be sanctioned. As regards Kolar, the 1st stage of the work is under progress and owing to the great importance of the Town it is necessary to complete the drainage works as early as possible. The Director of Public Health has already recommended to Government in his letter No C 342-76 dated 29/1/45 that the 2nd stage of the scheme might be taken up simultaneously with the 1st stage of the work and representations of the citizens of Kolar to ^{have} made to the Deputy Commissioner during his recent visit to Kolar in January 1945 (file see vide my D.O. No C 21/44 dated 26/1/45 to the Law Secretary). The proposal for the Government grant of Rs 20,000/- may therefore be sympathetically considered. As the total cost of the scheme is estimated to cost about Rs 35,000/- a special Government grant of Rs 20,000/- is urged for the current year 1944-45.

7
The main object of the Bill is for the better regulation of the public health
which has a population of over 15,000 and the question of con-
struction of a public health building is under consideration. The Sanitary Engineer
has been asked to prepare the plan and estimate and
Government grant of Rs 6000/- is recommended for the year which was
referred to as this is a useful work in the interests of the towns-
people and the Council have agreed to bear half the cost of the
work, a grant of Rs 6000/- is now recommended. As regards the drainage
work of public works, plans and estimates for Rs 63,260/- have been made
and by the Director of Public Health in Mysore is intimated in his
No C 19-2 dated 14/8/44. It is proposed to tile urgently the 1st
stage of the work which costs Rs 19,400/- The Municipality is a
poor body and its resources are very slender and it is unable
to meet its obligations such heavy items of expenditure. A special
grant of Rs 6000/- for the current year is kindly be mentioned.

3 Water works The present water supply at Chickballur is
too meagre and the requirements of the town cannot be satisfied by
the existing bore-well. It is therefore proposed to use the new
bore well which is in progress completion and to connect water taps to the
public streets. The Municipality have been often urging for the
improvement of the supply of water to the public and the Sanitary Engineer
has been addressed to prepare the estimates. The Government grant
of Rs 5000/- is recommended for the current year, as this is an urgent
and important work for the town.

4 The repairs of water main and sewerage have accumulated in
the town and the supply of water in the eastern portion of the town
therefore it is in progress is in order to provide to the limited
capacity of the water supply and want of levels. It is contemplated to
utilize the water supply in the town bed of Kolur town and
supply of water to, Alpet, Kumbhara and Fort and independently with
them, either by a new scheme or by improving the existing scheme. The
Municipality have been asking for raising a grant of Rs 6000/- for
philanthropic contribution for the former case and grant of Rs 10000/-
from Government is now recommended. As the Municipality has not got
sufficient funds to meet the requirements of the water maintenance charges
which are on the increase, a special grant of Rs 5000/- over and above
the regular maintenance charges incurred by the Municipality may also be

also be kindly mentioned

5 The favour of early order of Government respecting the above
recommendations is requested

I have the honour to be,
Sir,
Your most obedient servant,

Deputy Commissioner,
Kolar District
